AATIF JUNAID

Roll No: 2023UEC2662 | aatif.junaid.ug23@nsut.ac.in | +91 9289098099
B.Tech: Electronics and Communication Engineering
Leetcode | LinkedIn | GitHub | Portfolio

EDUCATION

BTech	2023-2027	Netaji Subhas University of Technology	8.13
Class XII	2023	White Leaf Public School, Delhi	92.6%
Class X	2021	Delhi Public School, Greater Noida	94.6%

INTERNSHIPS

Summer Trainee/Intern – NTPC Limited, Noida June 2025 – July 2025

- Developed a PDF Summarizer with Q&A using Python and NLP techniques, enabling automated report summarization and natural-language querying.
- Applied document parsing and transformer-based models to improve information retrieval from industrial reports.
- Gained exposure to data-centre infrastructure including servers, networking, cooling systems, and power management.

Summer Intern – Bharat Heavy Electricals Limited (BHEL), Noida June 2026 – July 2026

- Gained exposure to thermal power plant operations and SCADA-based industrial control systems.
- Gained exposure to AutoCAD, SmartPlant 3D, AVEVA E3D, and CADMATIC used in power plant design.
- Understood engineering design workflows within the Power Engineering Management department.

PROJECTS

Blind Assistance Wearable Device | Arduino, C++, Ultrasonic Sensors: GitHub

- Designed and developed a wearable obstacle-detection system using ultrasonic sensors and Arduino.
- Implemented real-time distance sensing and feedback mechanisms for visually impaired users.
- Collaborated in a 3-member team on hardware integration, testing, and enclosure prototyping.

UART Transmitter | Verilog HDL, Finite State Machines (FSM), RTL Design: GitHub

- Designed and implemented a UART transmitter in Verilog HDL using a Finite State Machine (FSM).
- Implemented serial data transmission with baud-rate control and a shift-register.
- Verified functionality using a Verilog testbench and simulation waveforms.

WhatsApp Sentiment Analyzer & Chat Analytics Dashboard | Python, Scikit-learn, Hugging Face, Streamlit, NLP: GitHub

- Developed a WhatsApp sentiment analysis platform using TF-IDF, SVM, Logistic Regression, and DistilBERT, achieving 85.45% three-class sentiment accuracy on 14,640 tweets.
- Built a chat analytics engine generating 20+ behavioral insights, including response times, activity trends, messaging patterns, and double-text detection.
- Developed a Streamlit dashboard with interactive Plotly visualizations, enabling local, privacy-preserving chat analysis.

TECHNICAL SKILLS

Programming Languages: C++, C, Python, SQL, Bash/Linux shell (basics)
Hardware Description Languages: Verilog HDL , Tcl (basics)
Embedded Systems: Arduino, Microcontrollers, Sensor Integration
Computer Architecture & Digital Design: Digital Logic Design, Finite State Machines (FSMs), Computer Architecture Fundamentals, CPU Pipelines, Cache Memory
Tools & Platforms: Git, GitHub, MATLAB, LTSpice
Libraries & Frameworks: NumPy, Pandas, Scikit-learn, TensorFlow, Hugging Face, Matplotlib
Web Technologies: HTML, CSS, Bootstrap, JavaScript

CERTIFICATIONS AND COURSES

- Verilog HDL: VLSI Hardware Design Comprehensive Masterclass on Udemy
- VLSI Design Flow: RTL to GDS - IIIT Delhi (Ongoing)
- Data Structures & Algorithms in C++ – Coding Blocks
- 150+ Questions solved on HDLBits.
- McKinsey Forward Program – Leadership & Problem-Solving Training by McKinsey & Company
- Reinforcement Learning – IIT Madras
- Machine Learning Specialization – Stanford Online, DeepLearning.AI on Coursera
- Data Analytics with Python – IIT Madras
- Intro to SQL, Advanced SQL, Pandas, NumPy, Intro to Machine Learning – Kaggle
- Deloitte Australia – Technology Job Simulation on Forage
- Full Stack Web Development (Ongoing) – Apna College Delta Batch

EXTRACURRICULAR ACTIVITIES

- Member, College Football Team.
- Runner-up — District Level Tennis Tournament (U15), Pathways School, Noida.
- Awarded Scholar Badge and Scholar Blazer for consistent academic excellence in school.
